This site may use spotlight ads/web beacons/GIF/pixel tags which are site instrumentation tools that help us to determine, for instance, whether a page has been viewed or not and, if so, how many times. Emails or electronic newsletters we send may use tools (e.g., pixel tags or web beacons) to gather email metrics and information to improve the reader's experience such as how many of the emails are opened, if they were printed or forwarded, the type of device (e.g., mobile or PC) from which they were opened, and the city, state, and county associated with the applicable IP address. In general, any electronic image viewed as part of a webpage, including an ad banner, can act as a web beacon.

This website may generate a "session log" when you visit our site. We use session logs to help us determine how people travel through our site. In this way, we can structure our pages so that the information most frequently visited is easier to find. By tracking page visits, we can also determine if the information we're providing is being used. The only data gathered is the Internet Protocol (IP) address from which you came (which contains no personal information), the website that referred you, the pages you visited and the date and time of those visits.
